

Asthma Treatments during Pregnancy

Are you treating a patient with asthma who is pregnant or planning a pregnancy?

MotherToBaby Pregnancy Studies is currently conducting an observational research study for pregnant women diagnosed with asthma.

You can contribute to the greater understanding of asthma and its treatments during pregnancy.

Refer your patients today!

MotherToBaby
PREGNANCY STUDIES

Help us **find answers** on how **asthma** and its treatments affect **pregnancy** outcome.

PATIENT PARTICIPATION INVOLVES:

- One to four phone interviews during pregnancy with at least one interview after delivery.
- Releasing medical records for their pregnancy and for their baby up to one year of age
- No travel or changes to healthcare routine are required

Information and Education From the Experts

MotherToBaby is the nation's leading authority and most trusted source of evidence-based information on the safety of medications and other exposures during pregnancy and while breastfeeding.
